## DETAILED ACTION

### *Election/Restrictions*

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: A gaming apparatus with a game that allows a player to choose between only one of a first win evaluation method that is three dimensional and a second win evaluation method that is different than the first. Thus, Species I allows the player to choose between win evaluation methods. Support for Species I can be found, for example, in FIG 12. Claims 1-3 and 8-18 are restricted to Species I.

Species II: A gaming apparatus with a game that allows a player playing a game with symbols in more than one geometric plane to generate a transparent overlay indicative of a three dimensional game option by user input. Thus Species II allows paylines that can be positioned by the user. Support for Species II can be found, for example, in FIG 23. Claims 4-7 and 19-21 are restricted to Species II.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no claims generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 3713

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Due to the distinct species presented in this restriction, a telephone attempt has not made because it has been determined a written restriction more readily identifies the issue of restriction at hand.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Marks whose telephone number is (703)-305-7497. The examiner can normally be reached on Monday - Thursday (7:30AM - 5:30 PM).
